

POTABLE WATER AND SANITARY SEWER ELEMENT TABLE OF CONTENTS

GOAL 1..... 1

OBJECTIVE 1..... 1

To coordinate with the providers of centralized potable water and sanitary sewer facilities to ensure that adequate facility capacity will be available to serve development concurrent with the demands for such facilities.

OBJECTIVE 2..... 4

To maximize the use of existing facilities in order to discourage urban sprawl and provide an adequate, safe, and environmentally sound system of potable water supply and sanitary sewer collection, treatment, and disposal.

OBJECTIVE 3..... 6

To provide for the coordination of public potable water and sanitary sewerage facility extensions in the unincorporated area of Alachua County with the Alachua County Future Land Use Element and capital improvement planning and programming.

OBJECTIVE 4..... 8

All public water supply systems serving Alachua County residents shall be maintained at accepted water quality standards.

OBJECTIVE 5.....8

To prevent the discharge of inadequately treated wastewater.

OBJECTIVE 6.....9

The County shall encourage wastewater effluent reuse and other incentives for the maximum utilization of reclaimed water to the greatest extent possible by facilitating the approval of environmentally-sound facilities.

OBJECTIVE 7.....10

To protect the potable water supplies and sources.

OBJECTIVE 8.....10

To promote the increased conservation and reuse of water.
