TABLE OF CONTENTS

Detail

	<u>Page</u>
List of Insets	x
List of Tables	xi
List of Maps	xii
I. EXECUTIVE SUMMARY	Exec Sum 1
Purpose	Exec Sum 2
Element organization	Exec Sum 2
Overview of data and analysis	Exec Sum 2
Overview of goals and objectives	Exec Sum 3
Relationship to other plan elements	Exec Sum 5
II. DATA AND ANALYSIS	
A. CONSERVATION STRATEGIES	Strategies 1
1. Introduction	Strategies 1
2. Information Strategies	Strategies 3
A. Indicators tracking	Strategies 3
B. Technology	Strategies 4
C. Education and outreach	Strategies 5
D. New framework for public involvement	Strategies 6
E. Intergovernmental coordination	Strategies 7
3. Land Acquisition Program	Strategies 7
A. State programs	Strategies 8
B. Alachua County Forever	Strategies 9
C. Local land trusts	Strategies 9
D. Means of acquisition	Strategies 10
E. Recreational opportunities on public lands	Strategies 11
F. Eco-tourism	Strategies 12
4. Regulatory Approach	Strategies 13
A. Whole-systems thinking	Strategies 14
B. Conservation land use categories	Strategies 15
C. Preservation land use category	Strategies 16
D. Resource protection standards	Strategies 16
E. Natural resources maps	Strategies 17
5. Incentives	Strategies 18
A. Tax breaks	Strategies 18
B. Innovative planning and zoning	Strategies 18
Flexibility: Clustering and planned developments	Strategies 19
Transfer of development rights	Strategies 19
Rural land stewardship areas	Strategies 19
C. Cost-shares and certification programs	Strategies 20
6. Conclusion: A Synthesis	Strategies 21

B. NATURAL RESOURCES

1. Air Resources	Air 1
A. Climate and weather	Air 1
B. Air quality	Air 1
C. Creation of local program	Air 3
1. Air monitoring	Air 4
2. Regulatory requirements	Air 6
3. Environmental education	Air 7
D. Indoor air	Air 7
References	Air 8
2. Earth Resources	Earth 1
A. Introduction	Earth 1
B. Physiography	Earth 1
C. Geology	Earth 4
D. Mineral resources	Earth 7
1. Mineral types	Earth 7
a. Limestone	Earth 7
b. Phosphate	Earth 7
c. Sand	Earth 8
d. Clay	Earth 8
e. Peat	Earth 9
f. Undifferentiated resources	Earth 9
g. Other subterranean resources	Earth 9
2. Mining regulations	Earth 10
E. Soils and Slopes	Earth 11
1. Soil properties	Earth 11
2. Agricultural use of soil	Earth 23
3. Soil erosion	Earth 23
References	Earth 27
3. Water Systems	Water 1
A. Introduction	Water 1
B. Importance: Hydrologic connections	Water 4
1. Aquifer recharge	Water 4
2. Aquifer discharge	Water 4
3. Water table elevation	Water 7
4. Groundwater flow	Water 7
5. Surface water flows	Water 7
6. Watersheds	Water 8
7. Wetlands and floodplains	Water 9
C. Status of water systems health in Alachua County	Water 12
1. Santa Fe River and Springs	Water 12
2. Orange Creek Basin Study	Water 17
3. Urban streams and creeks	Water 19

3. Water Systems (contd.)	
D. Protecting and improving water systems health	Water 20
1. Monitoring programs	Water 20
a. What do we monitor?	Water 21
b. Who does the monitoring?	Water 23
2. Resource-specific strategies	Water 24
a. Wellfield protection	Water 24
b. High aquifer recharge protection	Water 25
c. Springshed management	Water 29
d. Surface waters and wetlands protection/restoration	Water 30
e. Floodprone areas	Water 31
3. Pollutant source strategies	Water 33
a. Stormwater	Water 33
b. Fertilizer use	Water 34
c. Wastewater treatment program	Water 35
d. Septic tank regulation	Water 36
e. Private well regulations	Water 36
f. Mining and excavation	Water 37
g. Hazardous materials	Water 37
References	Water 38
4. Wetland Ecosystems	Wetland 1
A. Introduction	Wetland 1
B. Importance of wetland ecosystems	Wetland 2
1. Wetland functions	Wetland 3
a. Hydrologic flux and storage	Wetland 3
b. Biogeochemical cycling and storage	Wetland 4
c. Biological productivity	Wetland 5
e. Decomposition	Wetland 5
f. Community structure and wildlife support	Wetland 6
2. Wetland values	Wetland 6
a. Water quality	Wetland 6
b. Water supply	Wetland 8
c. Flood protection	Wetland 8
d. Erosion control	Wetland 8
e. Fish and wildlife habitat	Wetland 9
f. Recreation, aesthetics, culture, science	Wetland 9
g. Commercial benefits	Wetland 9

4. Wetland Ecosystems (contd.)	
C. Human impacts to wetlands	Wetland 10
1. Hydrologic alterations	Wetland 10
a. Water diversion structures	Wetland 11
b. Impoundments	Wetland 11
2. Urbanization	Wetland 11
a. Impervious surfaces	Wetland 11
b. Wastewater and stormwater	Wetland 12
c. Roads and bridges	Wetland 12
d. Sanitary landfills	Wetland 13
e. Non-native plants and animals	Wetland 13
f. Mosquito control programs	Wetland 13
3. Docks and piers	Wetland 14
4. Industry	Wetland 14
5. Agriculture	Wetland 14
a. Toxic compounds	Wetland 15
b. Grazing	Wetland 15
c. Silviculture/timber harvest	Wetland 15
6. Mining	Wetland 16
7. Atmospheric deposition	Wetland 16
D. Wetland-upland transition zone	Wetland 16
E. Status of wetlands in Alachua County	Wetland 18
F. Protecting wetland ecosystems	Wetland 20
1. Why activities are regulated	Wetland 20
2. Florida's wetland protection program	Wetland 20
3. Sovereign submerged land approvals	Wetland 21
4. Local protections: Alachua County	Wetland 21
a. Regulations	Wetland 21
Minimizing and mitigating impacts	Wetland 22
Buffers	Wetland 23
b. Private land conservation tools	Wetland 25
Financial incentives	Wetland 25
Education and outreach	Wetland 26
Private, industrial programs	Wetland 27
Homeowner stewardship	Wetland 27
References	Wetland 29
5. Biodiversity	Bio 1
A. Introduction	Bio 1
B. Importance of biodiversity	Bio 2
1. What is biodiversity?	Bio 2
2. Why is biodiversity important?	Bio 3
3. Rates of species extinction unprecedented	Bio 4
C. Human impacts upon biodiversity	Bio 5
1. Habitat destruction	Bio 5
2. Fragmentation	Bio 5
3. Direct exploitation	Bio 6
4. Other human disturbance	Bio 6

5. Biodiversity (contd.)

D. Status of biodiversity in Alachua County	Bio 7
1. Larger scale: Natural communities	Bio 7
a. Terrestrial/upland communities	Bio 7
b. Wetland communities	Bio 15
c. Forests	Bio 23
d. Altered/degraded communities	Bio 25
2. Smaller scale: Species level diversity	Bio 26
a. Vertebrates	Bio 26
b. Invertebrates	Bio 27
c. Plants	Bio 27
d. Listed and endemic species	Bio 28
E. Protecting biodiversity	Bio 36
1. Federal and state protections	Bio 36
2. Listing process	Bio 37
3. Species v. ecosystem protections	Bio 38
4. Local strategies: Alachua County	Bio 38
a. Identification	Bio 39
b. Acquisition	Bio 45
c. Regulations	Bio 45
Strategic ecosystems	Bio 46
Listed species habitat	Bio 47
Significant habitat	Bio 47
d. Stewardship	Bio 48
Working partnerships	Bio 48
Forest conservation strategies	Bio 48
Eco-tourism	Bio 49
References	Bio 50

C. HUMAN-RELATED RESOURCES Human 1

1. Energy Development and Conservation	Human 3
A. Introduction	Human 3
B. Energy conservation programs	Human 3
C. Site design utilization of passive energy techniques	Human 5
2. Open Space	Human 7
A. Introduction	Human 7
B. Functional categories of open space	Human 7
C. Open space requirements	Human 8

3. Scenic Quality	Human 10
A. Introduction	Human 10
B. Community design considerations	Human 10
C. Personal wireless service facilities	Human 11
D. Glare and light pollution reduction	Human 12
E. Beautification of visual corridors	Human 13
1. Scenic roads	Human 13
2. Scenic corridors	Human 13
3. Scenic US 441	Human 14
4. Gateways	Human 14
5. Street tree planting provisions for non-scenic corridors	Human 14
4. Vegetation Management	Human 15
A. Introduction	Human 15
B. Importance of trees	Human 15
1. Environmental benefits	Human 15
a. Air quality	Human 15
b. Climate control	Human 16
c. Soil	Human 17
d. Water	Human 17
e. Habitat	Human 17
2. Human-related benefits	Human 18
a. Noise	Human 18
b. Light pollution control	Human 18
c. Effects on human health and well-being	Human 18
d. Landmarks	Human 19
e. Property values	Human 19
C. Human impacts	Human 20
1. Water use	Human 20
2. Fertilizers	Human 21
3. Invasive plants	Human 21
D. Protecting trees	Human 22
1. Regulations	Human 22
2. Homeowner stewardship	Human 25
3. Landscaping with fire ecology in mind	Human 25

5. Agricultural and Silvicultural Practices	Human 30
A. Introduction	Human 30
B. Importance of agriculture	Human 30
1. Economic stability	Human 31
2. Environmental values	Human 31
C. Threats to agriculture	Human 33
D. Management concerns	Human 34
1. Conversion of native habitat	Human 35
2. Management intensity	Human 36
a. Toxic compounds	Human 37
b. Grazing	Human 37
c. Forestry	Human 37
E. Stewardship strategies	Human 39
1. Management solutions	Human 39
a. BMPs	Human 40
b. Wildlife enhancement	Human 40
c. Ecosystems management	Human 46
d. Sustainable agriculture	Human 47
e. Adaptive management	Human 48
2. Incentives and stewardship programs	Human 49
3. Forestry certification programs	Human 50
a. FSC	Human 51
b. SFI	Human 51
c. ATF	Human 54
d. FSP	Human 54
e. Green Tag	Human 54
4. Changing ownership strategies	Human 55
F. Regulatory framework	Human 64
1. State regulatory framework	Human 64
a. State comprehensive plan	Human 64
b. Right to farm act	Human 64
c. Silvicultural BMPs	Human 65
Applicability	Human 65
Compliance	Human 65
Effectiveness	Human 66
2. Local approach: Alachua County	Human 67
a. Intergovernmental coordination	Human 68
b. Working partnerships	Human 69
c. BMPs compliance and effectiveness	Human 70
d. Education and outreach	Human 70
e. Existing county regulations	Human 71
f. Certification and incentives	Human 71
g. Farmland protection strategies	Human 72
Identification of prime farmlands	Human 72
Regulatory strategies	Human 73
Incentives	Human 74
6. Wildfire Mitigation	Human 79

A. Introduction	Human 79
B. Wildfires of 1998	Human 79
C. Local approach: Alachua County	Human 80
1. Local mitigation strategy	Human 80
2. Firewise	Human 80
3. Natural fuels management	Human 80
4. Public education	Human 81
D. Sources of information on wildfire in Florida	Human 82
7. Hazardous Materials	Human 83
A. Introduction	Human 83
B. Hazardous Materials Management Code	Human 83
1. Facility Inspection Program	Human 84
2. On-call program	Human 86
C. State tanks compliance and petroleum remediation programs	Human 87
1. State tanks compliance program	Human 87
2. Petroleum remediation program	Human 88
D. Non-petroleum sites	Human 88
1. Abandoned dump sites	Human 89
2. Existing sanitary landfills	Human 89
3. Construction & demolition debris landfills	Human 90
E. Household hazardous waste collection program	Human 91
F. Brownfield initiatives	Human 92
8. References	Human 93

LIST OF INSETS

<u>Inset</u>		<u>Page</u>
 <u>Earth Resources</u>		
1.	Descriptions of Physiographic Zones in Alachua County	Earth 2
2.	Geologic Formations in Alachua County	Earth 4
3.	Characteristics of Soils for Planning Purposes	Earth 13
4.	Description of Land Evaluation and Site Assessment (LESA) System	Earth 24
 <u>Water Systems</u>		
5.	Three Aquifer Systems in Alachua County	Water 2
6.	Descriptions of Springs and Sinks	Water 5
7.	Description of Major Watershed Basins in Alachua County	Water 8
8.	Hydrologic Connections of Marshes and Riparian Forested Wetlands	Water 10
9.	Characteristics of Lakes and Ponds in Alachua County	Water 18
10.	Surface Water Quality Classification	Water 22
11.	High Aquifer Recharge Identification	Water 27
 <u>Biodiversity</u>		
12.	Upland Communities in Alachua County	Bio 8
13.	Wetland Communities in Alachua County	Bio 16
14.	Major Forest Types in Northeast Florida	Bio 24
15.	Disturbed/Altered Communities in Alachua County	Bio 25
16.	Maps of Important Components of Biodiversity in Alachua County	Bio 40
 <u>Agricultural and Silvicultural Practices</u>		
17.	Description of Silvicultural Best Management Practices	Human 41
18.	Description of Agricultural Best Management Practices	Human 43
19.	Examples of FSC Principles and Criteria	Human 52
20.	Incentives for Farmland Protection	Human 75

LIST OF TABLES

<u>Table</u>	<u>Page</u>
<u>Air Resources</u>	
1. Year 2000 Permitted Air Emission Sources and Reported Emissions	Air 2
2. Summary of 1997 Alachua County Air Emission Inventory	Air 3
3. Airborne Pollutants Known to Impact Ecological Systems in Alachua County	Air 4
4. Florida Ambient Air Quality Standards	Air 5
<u>Earth Resources</u>	
5. Important Features of the Soils of Alachua County	Earth 16
6. Soil Limitation Ratings	Earth 19
7. Soil Properties and Ranges for Limitation Ratings	Earth 22
8. Land Evaluation- Potential Ratings for Corn	Earth 25
9. Land Evaluation- Potential Ratings for Soybeans	Earth 26
<u>Water Systems</u>	
10. Springs of Alachua County	Water 15
11. Magnitude of Springs	Water 15
<u>Biodiversity</u>	
12. Threatened and endangered vertebrate species recorded from Alachua County	Bio 29
13. Threatened and endangered invertebrate species recorded from Alachua County	Bio 31
14. Threatened and endangered plant species recorded from Alachua County	Bio 33
15. Animal species and subspecies endemic, or nearly endemic, to Alachua County	Bio 34
<u>Vegetation Management</u>	
16. Native Trees of Alachua County	Human 26
<u>Agricultural and Silvicultural Practices</u>	
17. FFA’s Comparison of Forestry Certification Programs	Human 56
<u>Hazardous Materials</u>	
18. Reported Amounts of Hazardous Wastes by Waste Types for LQGs (1995)	Human 84
19. Reported Amounts of Hazardous Wastes by Waste Types for SQGs (1996-1997)	Human 86
